2. Enter your information.
3. Select "Check In Now."

Using AI to Address International Challenges

Jason Malec
Gloo AI

CapinCrouse International Symposium 2025

Meet Jason Malec.

He's doing for Christian content what Steve Jobs did for music — minus the turtleneck, and with a deep conviction that creators should control their work. Jason's helping build the infrastructure to make that happen, especially for faith-driven content owners navigating the age of AI.

Before stepping into the world of tech, he spent 25 years as a **pastor** and **parachurch leader** — first with **Andy Stanley at North Point**, then a startup **church in Denver**, and finally **American Bible Society**. (So yes, he knows how to preach, plant, and prototype.) He's been married to **Meredith** for 28 years, is dad to three grown kids (**Cassie, Abbey, and Jayce**), and has lived in 13 cities — which is either a sign of adventure or a very confused GPS.

Rooted in faith and fluent in strategy, Jason brings vision, clarity, and just enough dry humor to keep things interesting. He may have traded sermons for pitch decks, but the mission's still the same: serve people, tell the truth, build what matters.

Presentation Topics

1. The Why
2. The What - AI 101
3. The Challenges
4. The Opportunities
5. Next Steps

We have a moral imperative
to shape technology for good.

gloo

Shaping technology as a force for good,
so that people can flourish and communities can thrive

Scott & Theresa Beck
Founders of Gloo

Pat Gelsinger
Head of Technology,
Executive Chair

"Artificial Intelligence will be more transformative than the internet,
mobile phones, and social media combined."

"We missed the internet. We missed social media. Let's not miss this."

Is AI the savior of humanity or end of humanity??

What Is AI, Really?

Why AI Matters for Mission Leaders

Operational

“Folks using chatGPT outperform those who do not...by a lot. In every dimension. They finish 12% more tasks, 25% faster, with 40% higher quality results.”

~ Jeremy Utley
Stanford Professor, AI & Innovation Expert

gloo ai

Gloo AI Licensing

Protection – Fully secure and permission your content

Distribution – Choose who sees your content, and where

Monetization – Get paid every time your content is referenced

Gloo AI Tools

 gloo ai assistant

A 24/7 Resource Tool, sourcing exclusively your content

- Responds instantly to real questions about faith and life.
- Offers personalized engagement without adding to your staff's workload
- Surfaces trends and topics your people are asking about—so you're never guessing

 gloo ai chat

A search and chat tool that guides people to values-aligned content

- Explore trusted answers from values-based sources
- Designed for ministry teams seeking faith-based answers
- Free for anyone to use
- Great entry point for seekers and those looking for discipleship pathways

Proverbs 4:7

The beginning of wisdom is this: Get wisdom. Though it cost all you have, get understanding.
